**Prime Water**  
PRIME WATER COMPANY

**Prime Water Corp thinks  
about the future, your future  
And we can work together to  
make yours a successful one**

## The new Prime Water models make the most powerful antioxidant alkaline water ever made by a home water ionizer.

We appreciate your interest in our company and our products. My staff and I are dedicated constantly improving our Ionizers by introducing new technologies and conducting cutting edge, in-depth research on the benefits of drinking alkaline water.

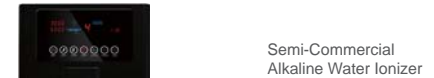

We were excited this year to introduce our new 2016 models that incorporated the latest in Prime Water Ionizer technologies such as Max Plates and Max Power - the heart of the most powerful home water ionization systems ever built. This was the introduction of our new Prime water ionizers. The new Prime Water models make the most powerful antioxidant alkaline water ever made by a home water ionizer. Plus, we increased the quality of our ionizers; our top-of-the-line models are so good that we back them with lifetime warranties!

We started Prime water in 2013 with a handful of people and only a few water ionizer products, but it didn't take long for us to research, test, and discover new devices, expand our inventory, and branch out to more clients. Luckily our customers loved our water ionizer product line and kept asking for more, so we worked diligently on ensuring that we had everything they needed. Now our inventory includes a vast variety of unique, and in some cases, exclusive products, and we're ecstatic to announce that in just a few years, not only have we flourished into a larger company, but our name Prime Water has become of the most trusted brands in the home water ionizer and filtration industry.

### Manufactured Products

Premium Alkaline Water Ionizer

Semi-Commercial Alkaline Water Ionizer

Hydrogen Water Ionizer

Premium Faucet

Multi-Level Water Cell

Multi-Stage Media Water Filter

### Prime Water Corp Global Network

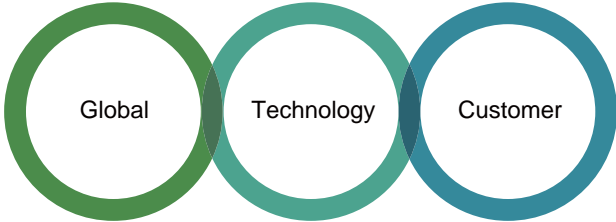

### A company working together and growing together

A company where the values of the customer and company grow together through cooperation formed by the communication and work between customers and employees.

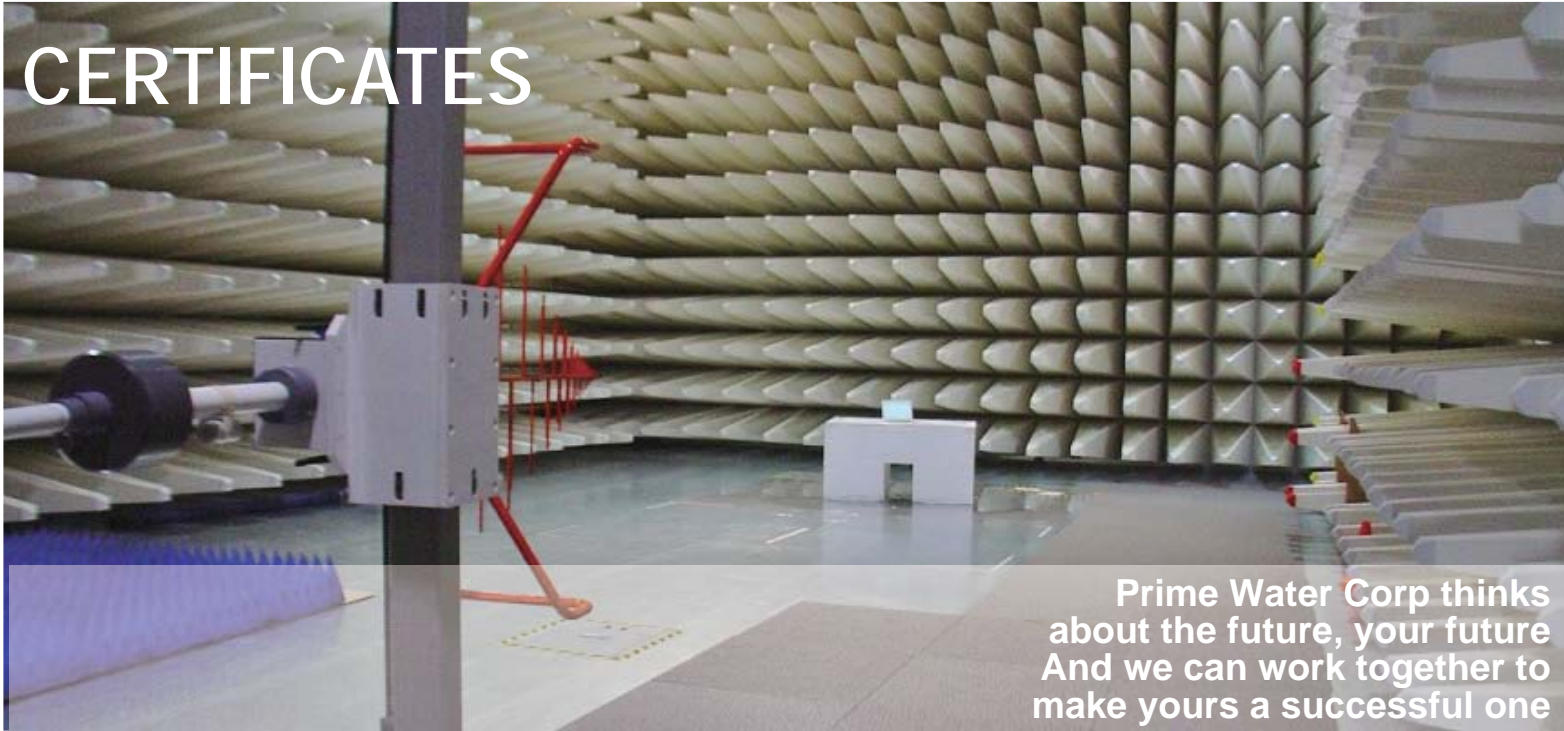

Shape the vright future for society and employees as a result of our contribution to the customers.

To be an excellent company which is always a models to benchmark not by its size but its excellence of operations.

- A global leader performing to the highest standards
- From business planning to operation we porvide complete services
- We improce the communities where we work and live to ensure a sustainable future for generations to come

Electrolytic Performance 40 days test

## New Larger Ultra Efficient Multi-Level Electrolysis chambers

### New Larger 13 Titanium/Platinum Plates

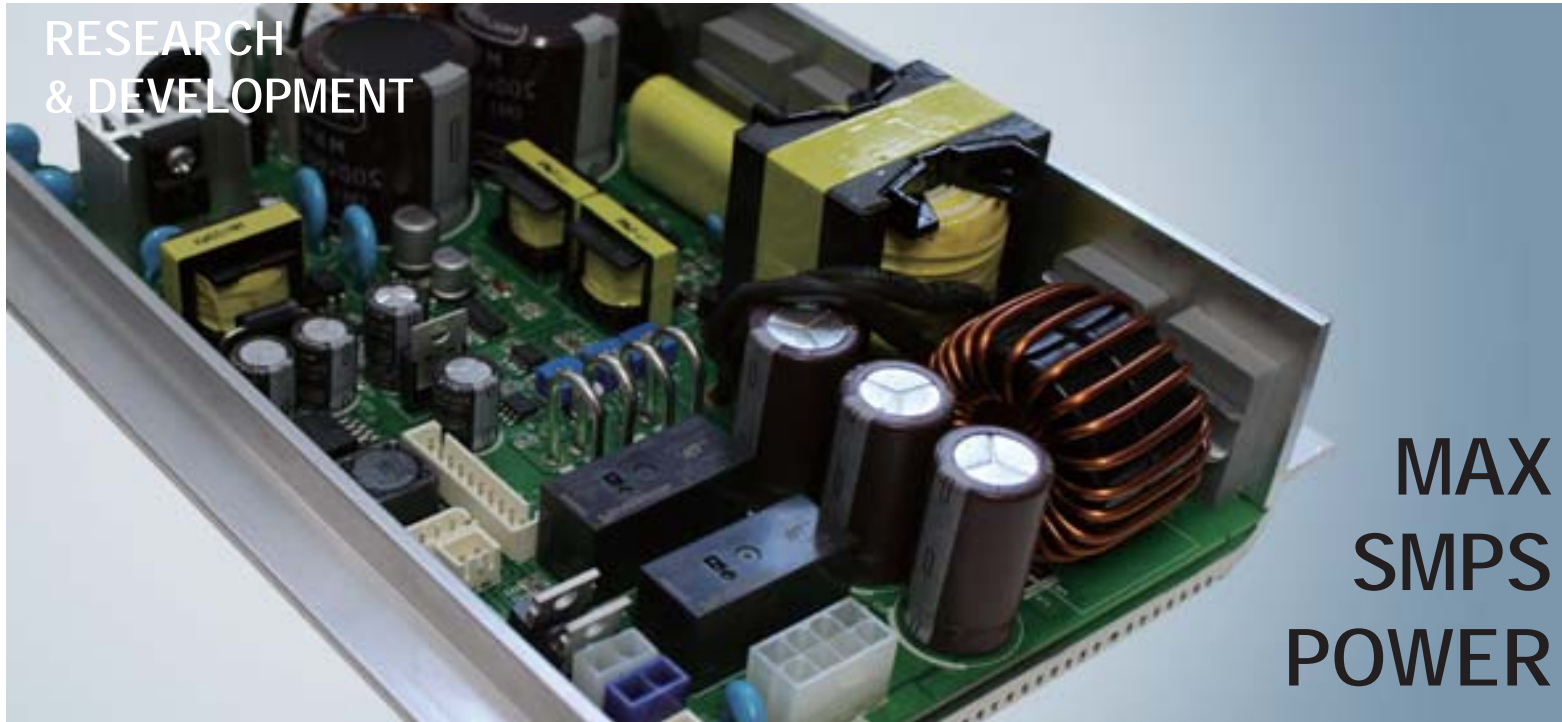

Prime Water Ionizers with Solid and Mesh plate delivers an electrical current to the water through an array of positively and negatively charged Platinum coated Titanium plates. The more the water passes in and out of the Titanium Mesh system and the greater the electrical charge to the water (especially when powered by the newer SMPS power systems) - the higher the pH (potential of Hydrogen) and the ORP (Oxidation-Reduction Potential) of the drinking water.

A mesh plate uses the same principle as the slotted plate, but improves upon it by providing cross-channelling to more evenly direct electron flow. The applied current more evenly saturates the plate, increasing the effective delivery of electrical current to create better alteration in your water. Mesh plate technology is just like the best irrigation systems

MAX  
SMPS  
POWER

Cooler Fan

# MAX Yield SMPS Power System

World First MAX 450Watts SMPS

Fully Adjustable Power

Up to 450 Watts ionizing power gives you the best pH and –ORP from your particular water source. SMPS provides more power, greater efficiency, and ultimate durability. Advanced Micom computer system.

Max SMPS (Switched Mode Power Supply) is the most advanced system on the market to insure that your water ionizer is producing the most powerful ionized water for years and years to come. Unlike the old outdated transformers, the SMPS system has been shown to last longer and run cooler. With the most up to date technology, you'll never have to worry about the pH or ORP levels of your water ionizer.

## PCB Cooling System

While these substrates have excellent electrical properties and processability, but poor heat resistance, high thermal path as is the heat from the heating element to a surface element surrounding air. But rely on a very small surface area of the surface of the component is insufficient to dissipate heat. And because a large amount of heat is generated in part passed the PCB, so the best solution is to increase the heat dissipation capability of the PCB itself in direct contact with the heating element is conducted away or dissipated via the PCB board.

& DEVELOPMENT

PREMIUM  
MULTI-STAGE  
DUAL FILTRATION

- 

**Activated Carbon**  
Coconut tree based activated carbon used to make water taste better by eliminating organic compounds, bad smells and flavors as well as foreign substances at the 18-50 mesh size.

---

- 

**Calcium**  
Slightly increases the alkaline mineral content in your water and improves the taste of water and removes odors. It also eliminates chlorine.

---

- 

**Biostone**  
Tourmaline emits Far Infra Red(FIR) energy naturally. FIR produces well documented health benefits and it also has an amazing effect on water. The Biostone contains the semi-precious gemstone tourmaline in ceramic form, so you get FIR on tap!

---

- 

**Felt (Fiber Filter)**  
Filters large particulate matter out of the water.

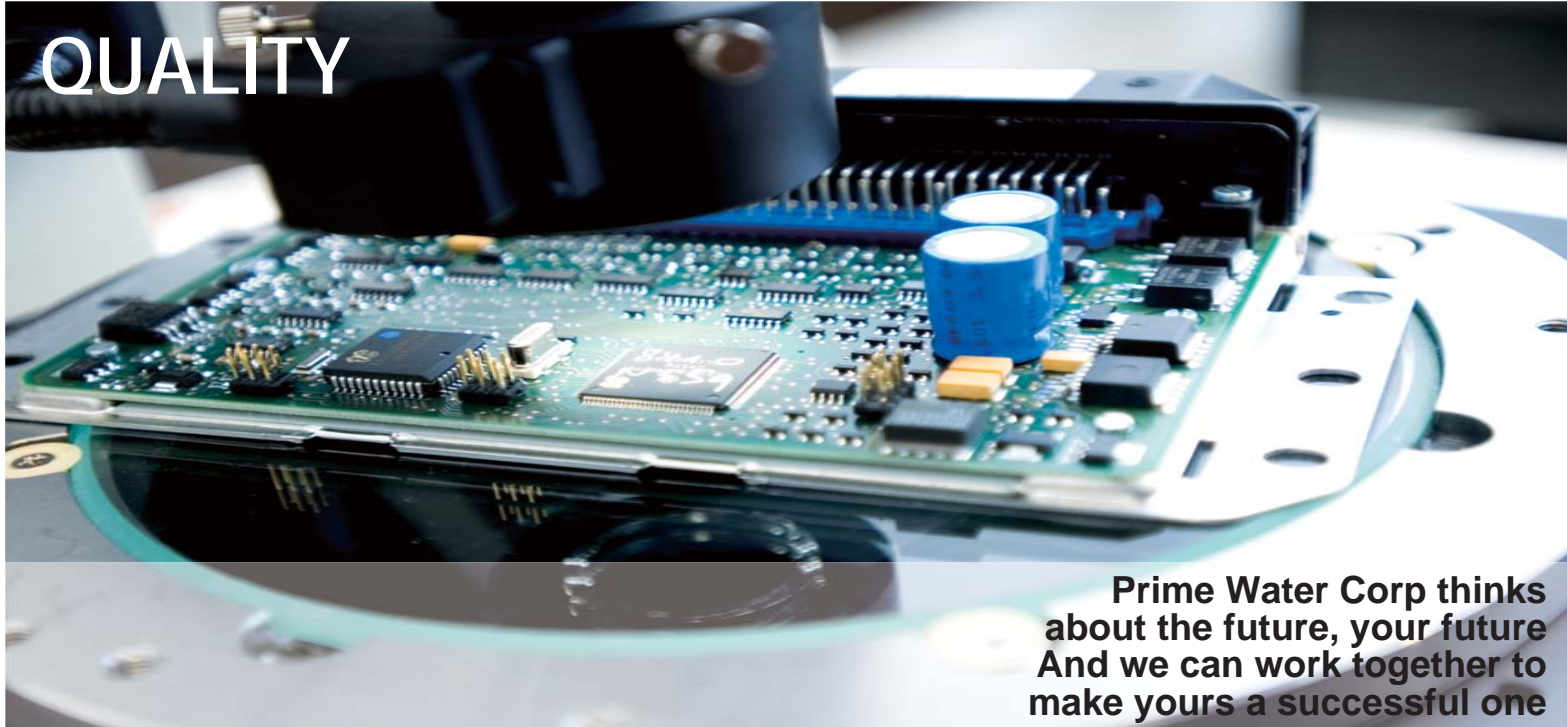

# Premium Multi-Stage Media ULTRA DUAL Filtration System

The Prime Water dual filtration system is made up of multi level stage specialized media filter and a premium activated carbon filter. The Premium Activated Carbon filter is structured to improve the reduction of heavy metals and fluoride found in many city water sources.

The silver activated carbon portion of the filter kills bacteria and keeps them from growing within the filter and being passed through to the electrolysis chamber.

The multi level stage sediment filter reduces additional sediment particles in the water maintaining the life and performance of your water ionizer.

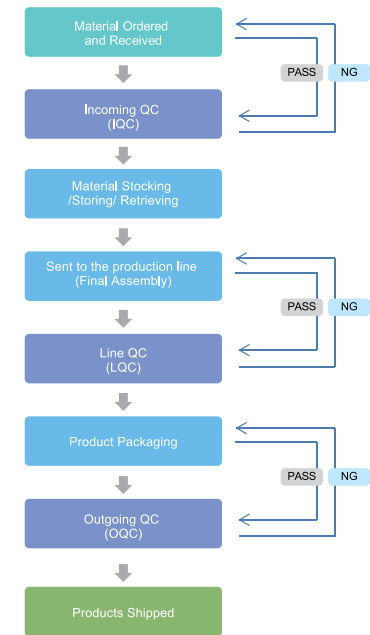

# QUALITY

**Prime Water Corp thinks about the future, your future And we can work together to make yours a successful one**

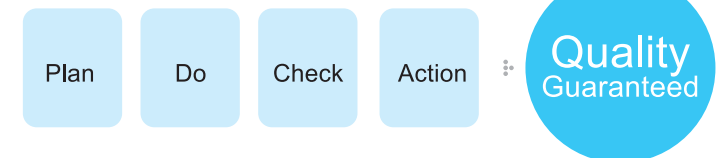

## QC Control Process

Quality control is our highest priority. Its purpose is to maintain and increase market share through strict adherence to the principles of:

Since it was founded, Prime Water Corp has undertaken a wide range of quality initiatives aimed at building strong customer loyalty. Prime Water Corp does not simply make products we make products that are a result of each employees dedication to them.

Ever mindful that the results of our work products will reach the hands of our customers, we always provide the best possible products and services based on our concept of total quality assurance.

## The Industry Leader in Semi-Commercial Alkaline Water Ionizer Technology

The 11 Plate Prime LC-11 wall mounted water ionizer by Prime Water Corp, has a suitably higher flow rate, and therefore capable of light duty commercial use. Perfect for domestic applications although can lend itself fit for small business use where ionized/ electrolyzed water is required on a larger scale.

The use and benefits of ionized/ electrolyzed water are many, and this machine is a good product at delivering results.

Dual Water Cell & 1,000 Watts SMPS extension optional
